2016 Annual Report

BUTTERFLY CREATED BY COLOMBIAN & U.S. EXCHANGE STUDENTS

PATHWAYS TO CHILDREN UNIVERSITY OF MINNESOTA SCHOOL OF PUBLIC HEALTH COLLABORATION

In January 2016, three University of Minnesota School of Public Health graduate students traveled to Kolkata, India where they continued to develop and advance a Community Health (Public Health) program at our Jan Seva school and the surrounding poverty-stricken community. This successful collaboration between Pathways and the University of Minnesota provides much needed health and disease prevention information and counsel while giving Public Health students from the U.S. avenues to implement health strategies in a culturally competent manner in poorly served countries.

ZEMENE'S SCHOOL IN ETHIOPIA

The long drought and famine where Pathways is building Zemene's School has finally cleared and construction is beginning with completion scheduled for Sept 2017. Executive Director Grace Strangis will be in Ethiopia for the dedication and welcomes interested donors to accompany her.

ST. JOHN VIANNEY SEMINARIAN TRIP TO KOLKATA

In January 2017, Pathways funded and accompanied 13 seminarians and Father Borello from St. John Vianney Seminary to Kolkata on a Mission of Mercy with the sisters of Mother Teresa. Most of the seminarians would never have had the opportunity or means for an experience like this. It not only greatly strengthened their faith but more importantly helped them to understand the importance of being attentive to the needs of their neighbors, especially those on the margins and in extreme poverty. The Seminary found the trip so important to these seminarians in their priestly formation that St. John Vianney has requested Pathways to accompany another group in early January 2018.

COLOMBIA

In July 2016, 17 students from Rochester Sister of St. Francis School in Bogota, Colombia travelled to Minnesota to reconnect with their recently formed friends from Cristo Rey high school. These Colombian travelers to Minnesota had previously been hosts to students from Cristo Rey in Bogota in November

2015. A double exchange student program was the result which created, what are sure to be, life-long friendships. During their visit they practiced soccer with the professional United soccer team, went to a Twins game, experienced being of service to those more needy in the U.S. by volunteering at "Feed My Hungry Children", helped clean up a North Minneapolis park and assisted in Spanish speaking day care facilities. Another group of Cristo Rey students will be traveling to Bogota in November 2017 so stay tuned!
